

STYL Precision RTLS for Hospitals

MoonFish location hardware + Atlantic software

"Find any nurse, doctor or critical device — to the bed — in seconds. In our cloud or in your data centre: your choice."

What it does

Finds staff

Each nurse and doctor wears a STYL UWB badge. The system shows the bed where each person is. The ward report shows where staff spent their time.

Finds critical equipment

Shows where pumps, ventilators and defibrillators are. It uses extra STYL tags, or your current RFID tags through Atlantic.

Makes the ward report

Records time at the bedside, ward rounds and response times. The report is ready at shift change.

Three reasons hospitals buy from STYL

1 Accurate to the bed

Accuracy is ± 20 cm. Most other systems show only the room. We show which bed in the room.

2 Cloud hosted or self-hosted

STYL cloud in Singapore, or fully in the hospital data centre. The customer chooses. Our design supports both.

3 Works with current systems

Operates alongside your Wi-Fi, RFID and nurse call, with no change to them. Atlantic also uses data from your other location systems and sensors.

Facts you can tell the customer

± 20 cm

Location accuracy. New position 2 times each second.

1 tag per bed

For nurses and doctors. 1 week between charges.

Unlimited users

All ward staff can see the reports

18 years

STYL in Singapore. ISO 27001 certified.

Who to talk to, and what to say

Person	Their problem	What you say
Director of Nursing	There are not enough nurses. Nurses spend time on reports and on searches for equipment.	The ward report is ready at shift change. Nurses get more time with patients.
Biomedical engineering	Equipment is lost, not used, or late for maintenance.	You see where each device is, how much it is used, and when it needs maintenance. Use our tags or your current tags.
Infection control	Contact tracing by hand takes a full day.	You see who was near a patient, and for how long, in minutes.
IT and security	Patient and staff data must stay inside the hospital.	You choose: STYL cloud in Singapore, or your own data centre.

Say

- "Accurate to the bed."
- "Ward reports, ready at shift change."
- "Our cloud or your data centre: your choice."

Do not say

- "Track your nurses." Staff do not accept it.
- "Medical grade" or "clinical alerts." We are not certified for this.
- "Staff help button." The badge does not have one yet.

One product: Ward. Two ways to host it.

Every quote has three parts: software, hardware service and set-up. We always price by bed.

Part 1 — Software: select the hosting

	Ward — Cloud hosted	Ward — Self-hosted
Software, per bed per year	S\$450	S\$450
Platform fee, per site per year	Included	S\$95,000 Solace licence and our support
Servers and GPU	STYL provides	Hospital provides, to our specification
Questions to Atlantic in plain language	30 per bed per month	No limit from STYL
Software updates	Automatic	We install them with your IT team
Where we sell it	Singapore	Singapore and Japan

Both options include: map of staff and equipment to the bed · equipment search, alerts and reports · ward reports (bedside time, rounds, response time) · contact tracing · nurse call connection through its API · unlimited users.

Part 2 — Hardware service

S\$30 per bed per month in bays with 3 or more beds.
S\$60 per bed per month in rooms with 1 or 2 beds. Each room needs at least 3 anchors.
It includes anchors, spare parts and repairs. **Each bed includes 1 staff tag** for nurses and doctors. Extra tags can also go on equipment. The site survey sets the number of anchors. Anchors use PoE or mains power.

Rules and extras

Item	Price
Minimum software fee for each site	S\$60,000 / year
More questions (cloud hosted)	S\$3,000 per 10,000
More tags (one time)	S\$800 per 10
Contract	3 years

Part 3 — Set-up (one time)

- Site survey
- Installation, priced for each anchor
- Nurse call connection. The supplier must give an API.
- Options: 3D model of the buildings, link to patient records

Example: 500 beds, all in bays

Part	Cloud	Self-hosted
Software: 500 × S\$450	225,000	225,000
Platform fee	—	95,000
Hardware: 500 × S\$30 × 12	180,000	180,000
S\$ per year	405,000	500,000
Per bed per month	S\$67.50	S\$83

Set-up is extra.

Start with a Ward Pilot

1 ward Up to 40 beds	90 days Cloud, or on-site with Atlantic-in-a-box	S\$40,000 Fixed fee	Credit Fee goes to year 1 if the hospital buys
--------------------------------	--	-------------------------------	--

Ask in the first meeting

Question	Why you ask
How many beds? How many are in bays, and how many in rooms with 1 or 2 beds?	Sets the hardware price, the anchor count and the set-up price.
Who makes the ward report today, and how long does it take?	Shows the value of the Ward package.
Which nurse call system do you use? Does the supplier give an API?	We connect through the API.
Do you want STYL cloud, or your own data centre?	Sets the hosting option.

Before the pilot: agree the success measures, the full price and a reference. **Discounts:** Sales Director approves up to 20%. CEO approves more than 20%. No discount on the minimum fee or on the platform fee. Prices in SGD, before GST.
