

STYL Precision RTLS for Cargo and Ground Handling

MoonFish location hardware + Atlantic software

"Find any ULD, dolly or staff member, to the bay, in seconds. No hardware to buy."

What it does

Finds staff

Each staff member wears a STYL badge. The map shows where each person is, to the bay.

Finds equipment and cargo

Tags on ULDs, dollies and tractors show where each item is and how long it stays.^E

Makes the shift report

The report shows idle equipment, dwell time and zone alerts. It is ready at shift change.

Three reasons customers buy from STYL

1 Accurate to the bay

Accuracy is ± 20 cm for a staff badge. Most RFID and BLE systems show only the zone.

2 No hardware to buy

Hardware is a monthly service. STYL owns, repairs and replaces it.

3 Works with current systems

Atlantic reads your RFID and BLE data. Our cloud in Singapore, or your data centre.

Facts you can tell the customer

± 20 cm

Location accuracy for a staff badge.

2 each second

New position for each badge.

Unlimited users

All shift staff can see the map and reports.

18 years

STYL in Singapore. ISO 27001 certified.

Who to talk to, and what to say

Person	Their problem	What you say
Cargo operations manager	Staff search for ULDs, dollies and tractors.	"You see where each ULD and vehicle is, now."
Safety manager	Staff and vehicles share the same areas.	"You get an alert when a person enters a vehicle zone."
Finance	Equipment is idle or lost.	"You see how much each item is used. Buy fewer."
IT and security	Data must stay under our control.	"Our cloud in Singapore, or your data centre."

If the customer names a competitor

The customer says	You say
"We use RFID or Zebra."	"Keep it. Atlantic reads your RFID data. Add STYL where you need the exact bay."
"Sewio or Pozyx is cheaper."	"They sell a kit. You buy and run the hardware. We own, repair and replace it for a monthly fee."
"We scan barcodes."	"A scan shows where the item was. We show where it is now."
"BLE costs less."	"BLE shows the zone. We show the bay, 2 times each second."

Say

- "Find any ULD or vehicle in seconds."
- "No hardware to buy."
- "Our cloud or your data centre: your choice."

Do not say

- "Unlimited tags." The number of anchors sets the limit.
- "Works outdoors in all weather." Hardened kit is not tested.
- "Safety system" or "collision avoidance." We give alerts only.

One price per 1,000 m². Three parts.

We price by the floor area that the customer wants to see. Each 1,000 m² includes 8 anchors and 40 tags. ^E = Engineering must confirm this before release. If not confirmed, remove it.

SOFTWARE
S\$9,000
per 1,000 m², per year

+

HARDWARE SERVICE
S\$250
per 1,000 m², per month

+

SET-UP
After survey
one time

Part 1 — Software

Part 1 — select the host	Operations — Cloud START HERE	Operations — Self-hosted
Software, per 1,000 m ² per year	S\$9,000	S\$9,000
Platform fee, per deployment per year	Included	S\$95,000
Servers	STYL provides	Customer provides, to our specification
Software updates	Automatic	We install them with your IT team
Where we sell it	Singapore	Singapore and Japan

Both include: map of staff, equipment and cargo · search · zone alerts · dwell and use reports · links to RFID and BLE data · unlimited users.

Part 2 — Hardware service

- S\$250 per 1,000 m² per month, indoor.
- S\$500 per 1,000 m² per month, hardened kit for apron and outdoor areas. ^E
- Includes 8 anchors and 40 tags for each 1,000 m², spare parts and repairs.
- Extra tags: S\$800 for 10 (hardened S\$1,600 for 10).
- The site survey sets the number of anchors.

Part 3 — Set-up (one time)

- Site survey: S\$6,000 for each site.
- Installation: S\$200 for each anchor (hardened S\$400).
- Links to the cargo or warehouse system: S\$1,400 for each engineer-day.

Price changes

Change	Price
Minimum software fee	S\$60,000 per site per year
Self-hosted	+ S\$95,000 platform fee per deployment
Hardened area	Hardware price × 2
Contract	3 years

Example: 2 cargo sites, cloud

Part	S\$ per year
Software: 20 × S\$9,000	180,000
Hardware: 12 × S\$250 × 12 (indoor)	36,000
Hardware: 8 × S\$500 × 12 (apron)	48,000
Per year	264,000
Per 1,000 m ² per month	S\$1,100

12,000 m² indoor + 8,000 m² apron. One time: set-up S\$77,800; 222 packs of extra tags S\$177,600.

Start with a pilot

1 zone
Up to 2,000 m² in one shed.

90 days
Cloud, or Atlantic-in-a-box on site.

S\$25,000
Fixed fee. Hardened zone S\$35,000.

Credit
Fee goes to year 1 if the customer buys.

Ask in the first meeting

Question	Why you ask
How many m ² do you want to see? How much is outdoor?	Sets the hardware price and the anchor count.
How many items need a tag?	Sets the allowance and the extra packs.
Which cargo or warehouse system do you use?	Sets the link work.
Our cloud, or your data centre?	Sets the host option.

Before the pilot: agree the success measures, the full price and a reference. **Discounts:** Sales Director approves up to 20%. CEO approves more than 20%. No discount on the minimum fee or the platform fee. Product confirms the tag density and the hardened price before each quote. Prices in SGD, before GST.
